University, Jodhpur

January 13, 2014

- ▶ Name of compiler is *latex*.

- ▶ **Commands:**

$\$ latex test.tek$  ; compiles and produces output as .dvi (device independent file)

$\$ xdvi test.dvi$  ; displays the dvi file

$\$ dvips test -o test.ps$  ; produces output proscript file for printing

$\$ dvi2pdf test.dvi test.pdf$  ; produces output pdf file

**Note:** For viewing documents having images, the .ps file is necessary. Simple .dvi cannot display the images.
